JERICHO FARMS ‘OUT OF SEASON’ DIGGING AGREEMENT

Completion of this form is required before we dig plants out of season. **PAYMENT FOR ALL PLANTS DUG ‘OUT OF SEASON’ IS C.O.D.**

Digging B&B plants when they are leafing out and/or actively growing during late spring through early fall **IS NOT RECOMMENDED**. Minimal to extreme stress and/or death of plants is an increased risk when plants are dug outside of the optimal dormancy digging season.

Jericho Farms WILL NOT BE RESPONSIBLE for any issues or losses resulting from ‘out of season’ digging. If plants must be dug ‘out of season’ at the customer’s request, post-harvest watering, a common practice in the nursery industry, will be done at our nursery. This post-harvest watering does not imply any guarantee regarding the performance or survivability of plants.

I _____ of _____ understand the risks of ‘out of season’ digging. By signing below, I authorize Jericho Farms to dig the material listed. Furthermore, I assume complete responsibility for and release Jericho Farms from any and all risks/losses that may occur as a result of ‘out of season’ digging.
